

New Highflow – the latest in water heating technology from **Bosch**

Bosch is proud to introduce their new range of continuous flow electronic gas hot water systems...Bosch Highflow

The new Bosch Highflow range consists of the most advanced continuous flow gas water heaters to be sold in Australia and New Zealand.

The new range is available in 17, 21 and 26 litre per minute flow rates, to ensure all your household water needs are met.

Representing the forefront of water heating innovation, the new Bosch Highflow range boasts the highest star ratings on the market today. With a minimum 5.5 Star energy rating on every Highflow system, these environmentally friendly units not only reduce running costs today, but help to preserve the environment for tomorrow.

Additionally, you can now enjoy complete control over your hot water by installing up to 4 optional temperature controllers. This allows precise selection of water temperature throughout the kitchen, bathroom, laundry and en-suite, providing parents with added peace of mind for the safety of their children.

For more information on Bosch hot water systems, call the Bosch Customer Contact Centre today or visit:
