MODEL NO.  
511161/1CS26-24G

## FEATURES

- **Split System design** – With only one compact sized roof mounted collector, and a 160 litre ground mounted tank, the 511161 can be located out of sight.
- **Continuous flow gas booster** – Enjoy endless, efficient hot water from the standard 24L/min continuous flow booster, or additional hot water from a 27L/min booster remotely installed.
- **High efficiency solar collector** – Resourcefully absorb maximum energy from the sun.
- **Enhanced frost protection** – Electronically controlled circulation of water prevents frost damage.
- **Efficient performance** – With all of its tank capacity available for solar heating, a CSA2612 collector and 6 star efficient gas boosting, calculated energy reduction of up to 60%<sup>1,2</sup> may be achieved.
- **No hard-wiring required** – Thanks to its plug in design, the 511161 saves the additional cost of having an electrician on-site during installation.
- **Complies with regulations** – The 511161 is certified to comply with current new home water heating regulations in Victoria.
- **Integrated solar controller** – Factory fitted, reducing both installation time and complexity.
- **5 year warranty<sup>5</sup>** – Enjoy the peace of mind a comprehensive 5 year warranty<sup>5</sup> provides.
- **Eligible for STCs<sup>4</sup>**

## HOW IT WORKS

Rheem Loline Solar water heaters use roof mounted solar collectors to absorb heat energy from the sun, which is transferred to water stored in the tank at ground level. They are highly efficient, economical to run and help reduce the production of greenhouse gas emissions. The Rheem Loline 160 with automatic electronic controls will provide continuous hot water all year round, even during poor weather periods.

COMES ON STEADY, HOT AND STRONG

## STCs

Small-scale Technology Certificates (STCs) are a financial benefit to encourage the installation of solar water heaters provided under a Federal Government legislated scheme.

This map shows the climate Zones within Australia which will define the number of STCs allocated to an approved solar water heater. Your installation may be eligible.\*\*

To claim your STC entitlement, simply complete the STC Assignment form. Visit [www.rheems.com.au/rebates](http://www.rheems.com.au/rebates) to download the STC Assignment form.

- Energy reduction of up to 60% based on Victorian ESC approved TRNSYS simulation modelling in Zone 4. Savings will vary depending upon your location, type of system installed, type of water heater being replaced, hot water consumption and fuel tariff.
- Any financial savings will vary depending upon type of Rheem Solar system installed, orientation and inclination of the solar collectors, type of water heater being replaced, hot water consumption and fuel tariff. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff.
- Eligibility criteria apply.
- Warranty Conditions: solar tank – 5 years supply on cylinder and solar collectors, 3 years labour on cylinder, 1 year labour on solar collectors, 1 year supply and labour on other parts; continuous flow gas booster – 10 years supply on heat exchanger, 3 years labour on heat exchanger, 3 years supply and labour on other parts. Applies to a single-family domestic dwelling only. Conditions apply, see Rheem's warranty set out in the product's Owner's Guide or view it at [www.rheem.com.au](http://www.rheem.com.au). Phone 131 031 for details.
